ABSTRACT

This report presents Scholastic Assessment Test (SAT) results for high school seniors in the Wake County Public School System (WCPSS), North Carolina. In Wake County, the number of seniors taking the test rose to 3,496 in 1998-99, an increase from 3,377 in 1997-98 (3.5%). The average SAT score for WCPSS seniors in 1998-99 (1059) was the third highest in the state. The average score for WCPSS students increased by seven points over the preceding year, the fifth consecutive year of rising scores. The national average score was 1016. The WCPSS total score increase of 60 points over 10 years greatly exceeds state and national average increases. Tables contain scores for the WCPSS, each school, and the United States for the verbal and mathematics tests of the SAT I, with scores grouped by family income, parents' education level, and high school rank. (Contains 6 tables, with Table 6 divided into the 13 system schools.) (SLD)

1998-99 Scholastic Assessment Test (SAT) Results

September 20, 1999

Author: Caroline Gay Fejoku (850-1878)

ABOUT THE SAT

The SAT is a national examination, offered through the College Board, designed to assess a student's chances of success at the college level. Nationwide, 1,220,130 students in the 1999 graduating class took the SAT I prior to graduation—a 4.0% increase from 1998. In Wake County, the number of seniors taking the SAT I rose to 3496 in 1998-99 from 3377 in 1997-98, a 3.5 percent increase.

There are two types of SAT exams: SAT I and SAT II. The SAT I is a reasoning assessment of students' verbal and mathematics skills. Through the SAT II students are tested in specific subject areas. This bulletin summarizes national, state, and county SAT I data.

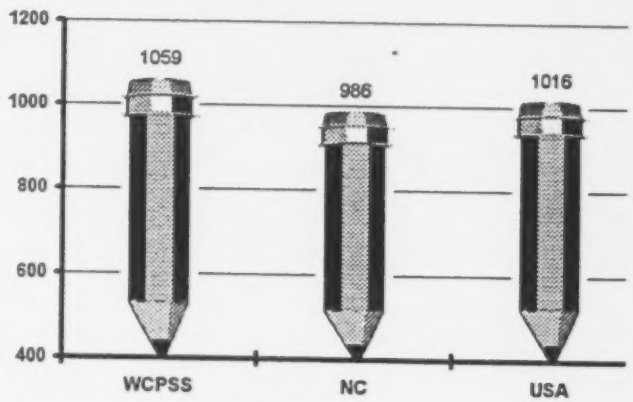
In April 1995, the College Board *recentered* the score scales for students taking the SAT to reflect the contemporary test-taking population. Recentering allows for easier interpretation of scores and more simple comparisons between students' verbal and mathematics abilities.

To permit comparisons with previous years, the College Board has provided conversions of old scores to the new scale. Conversions and new scales are used throughout this bulletin.

DISTRICTWIDE RESULTS

The average SAT score for WCPSS seniors in 1998-99 (1059) was third highest in the state. Chapel Hill-Carrboro led with 1160 and Asheville City followed with 1069.

The average score for WCPSS students increased by 7 points over 1997-98—the fifth consecutive year of rising scores. This increase exceeds the 4 point gain for the state. Nationwide, scores decreased by 1 point. A comparison of WCPSS, NC, and the United States is shown below.



While scores were up, participation of the WCPSS senior class reached a new high at 76.3%, rising slightly from 75.6% in 1997-98. U.S. participation remained steady at 43%, and NC participation dropped one point to 61%.

All scores are reported on the recentered scale.

The approximate rate of 76% participation in the WCPSS is calculated by dividing the number of students who took the SAT by the size of the 12th grade class at the end of the eighth month of the senior year. The average WCPSS senior taking the test scored 26 points higher on the math test and 17 points higher on the verbal test than the average senior across the country.

WCPSS average math scores have increased 39 points in the last 10 years (see Table 1); average verbal scores increased 21 points; and participation rates remained stable at or near the 75% mark.

The WCPSS total score increase of 60 points over 10 years greatly exceeds both the national increase of 15 points and the NC increase of 38 points. It is also notable that over the past 10 years there has been a steady increase in WCPSS scores except for a one-point decline in 1994.

1995	1039	524	515	76.0	970	482	488	60.0	1010	506	504	41.0
1994	1030	520	510	75.0	964	482	482	60.0	1003	504	499	42.0
1993	1031	521	510	76.0	964	481	483	60.0	1003	503	500	43.0
1992	1025	516	509	74.0	961	479	482	57.0	1001	501	500	42.0
1991	1007	508	499	75.0	952	474	478	57.0	999	500	499	42.0
1990	999	498	501	73.0	948	470	478	55.0	1001	501	500	40.0

The score for the average WCPSS student compared well to students in other similar large school districts in other states as illustrated in Table 2. While WCPSS exceeded several districts, the average score was lower than the average score in Fairfax County Virginia.

Part. signifies participation rate.

As shown above, total scores for seven of Wake County's high schools improved over the 1997-98 scores and only two schools had a total score below the NC average. There were four schools that gained 15 or more points over 1997-98; Enloe led this group with an increase of 39 points.

Last year, WCPSS had the second highest score of districts across the state. This year WCPSS ranked third. Chapel Hill-Carrboro continues to lead NC districts with a score of 1160.

SAT information can be disaggregated in many ways. As shown in Tables 4 and 5, significant gaps continue to exist between males and females and Black and White students. The trend can be seen nationally as well as state- and county-wide. However, this gap has been closing over the past decade according to the National Center for Education Statistics.

NA indicates either that data is not available or the small number of students makes it not appropriate to report an average score.

[1]School participation rate is calculated by dividing the number of students who took the SAT by the size of the 12th grade class at the end of the eighth month of the senior year.

NA indicates either that data is not available or the small number of students makes it not appropriate to report an average score.

[1]School participation rate is calculated by dividing the number of students who took the SAT by the size of the 12th grade class at the end of the eighth month of the senior year.

NA indicates either that data is not available or the small number of students makes it not appropriate to report an average score.

[1]School participation rate is calculated by dividing the number of students who took the SAT by the size of the 12th grade class at the end of the eighth month of the senior year.

NA indicates either that data is not available or the small number of students makes it not appropriate to report an average score.

[1]School participation rate is calculated by dividing the number of students who took the SAT by the size of the 12th grade class at the end of the eighth month of the senior year.

Wake County
Wake Forest-Rolesville High
Participation Rate[1]=79.5
